

Plank grating Dimple

Steel 240 YP

Punched hole mesh gratings CUBE® has a high strength-to-weight ratio which means that strength is maintained while weight is reduced. The greater the span, the lower is the weight – in relation to pressure-locked mesh gratings. The CUBE® grating can be produced in three design variants depending on how much slip resistance is needed. CUBE® mesh gratings are recommended in most constructions and industries where high air- or liquid flow are required.

Specifications

Free area	50-56 %
Downward drainage holes	34x34 mm
C-C grid	43,5 x 43,5 mm
Ball proof	35 mm in accordance with EN ISO 14122-2
	550 °C
